World Blindness and its Prevention

Volume 2

**The International Agency for the Prevention of Blindness
under the direction of Sir John Wilson**

This book describes the development of the global strategy for the prevention of blindness, and outlines national and regional planning programmes, and the mobilization of resources. 0 19 261480 0 £8.95

Perinatal Epidemiology

Edited by Michael B. Bracken

This volume is the first full review of the subject, and deals with many topics central to this field, such as spontaneous abortion, congenital malformation, prematurity, low birth weight, infertility, and infections. 0 19 503389 2 £40

A Dictionary of Epidemiology

Edited by John M. Last

The first dictionary of epidemiology to be published, this invaluable guide will help students, epidemiologists, and other health professionals understand the often confusing nomenclature of the field. 0 19 503256 X £16, 0 19 503257 8 paperback £6.95

An Introduction to Epidemiologic Methods

Harold A. Kahn

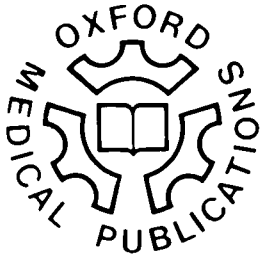

'Rarely does one find a new book in epidemiology or statistics which genuinely fills a gap in the literature . . . a wonderful text for those who already know the basics of epidemiology and desire to understand fully the statistical repertoire that has become essential for presenting and interpreting the findings of epidemiological investigations.' *The Lancet* 0 19 503380 9 paperback £12.50

Evaluation of Health Care

Edited by Walter W. Holland

This volume, aimed at those concerned with making policies toward and establishing priorities in health services, shows how health services can be evaluated. It sets out methods for evaluating, the practical applications of these methods, and the circumstances under which evaluation should occur. 0 19 261412 6 £25
