Cancer Causes and Control brings together previously dissipated studies concerned with the causes, control and subsequent prevention of cancer within population groups. This area of research has made a significant contribution to the overall knowledge of cancer causes. Cancer Causes and Control seeks to encourage further investigations in this area, including such topics as variation in cancer distribution within and between populations; factors associated with cancer risk; preventive and therapeutic interventions on a population scale; economic, demographic and health policy, and related methodological issues. It is also concerned with the costs and benefits of current successes in the treatment of cancer.

Papers are normally published between 8 to 12 weeks from acceptance. The Editors invite submission of research papers. Sample copies, which include Instructions to Authors, are available on request.

RECENT PAPERS INCLUDE:
- Oral contraceptives and primary liver cancer among young women
  A W Hsing, R N Hoover, J K McLaughlin et al
- Esophageal cancer in Shanxi Province, People's Republic of China: a case-control study in high and moderate risk areas
  Y-P Wang, X-Y Han, W Su et al
- Optimization of cervical cancer screening
  L Gustafsson and H-O Adami
- Incidence of childhood malignancies in the vicinity of West German nuclear power plants
  J Michaelis, B Keller, G Haaf and P Kaatsch
- Obesity in youth and middle age and risk of colorectal cancer in men
  L Le Marchand, L R Wilkens and M Ming-Pi
- Alcohol consumption and lung cancer in White males
  E V Bandera, J L Freudenheim, S Graham et al
- Reproductive factors in the etiology of hepatocellular carcinoma
  J L Standord, D B Thomas and the WHO Collaborative Study of Neoplasia and Steroid Contraceptives
- Major histocompatibility complex, t-complex, and leukemia
  M T Dorak and A K Burnett
Glaxo Senior Lecturer/Lecturer in Ophthalmic Epidemiology
DEPARTMENT OF PREVENTIVE OPHTHALMOLOGY
INSTITUTE OF OPHTHALMOLOGY

The Institute of Ophthalmology wishes to appoint a suitable candidate to a senior lecturer/lecturer's post, in the Department of Preventive Ophthalmology (The International Centre for Eye Health). The research and teaching of this department, which is a WHO Collaborating Centre for the Prevention of Blindness, is focused on the major blinding diseases of the less-industrialized world.

The work will include: Development of new cross-sectional surveys, aetiological studies and intervention trials, for the prevention of blindness; collaboration with present members of staff and previous students in setting projects in the field, supervision of data collection and analysis; teaching of epidemiology and supervision of MSc, Diploma and Certificate students in the Community Eye Health Courses.

Candidates may be clinical or non-clinical, with an appropriate higher degree, with formal training in epidemiology (and evidence of a good track record of research). They should have experience in field work and in design and management of different types of epidemiological studies. Skills in management and analysis of epidemiological data are essential. Candidates must be willing to travel overseas. Informal enquiries to Prof. Gordon Johnson (071-608 6907) or Mr Darwin Minassian (071-608 6903). The salary will be in the range £18,572-£48,945 according to negotiation and a London Allowance will be payable. Formal applications, comprising a curriculum vitae, a list of publications, details of research funding and the names of three referees should be sent to Miss C. Griffiths, Secretary, The Institute of Ophthalmology, Bath Street, London EC1V 9EL from whom further particulars may be obtained.

Closing date: 30 November 1992.

Chair in Ophthalmic Epidemiology in the new Glaxo Department of Ophthalmic Epidemiology
THE INSTITUTE OF OPHTHALMOLOGY IN CONJUNCTION WITH MOORFIELDS EYE HOSPITAL

An epidemiologist with an excellent track record in research is sought to lead a new Department endowed by Glaxo plc in the Institute of Ophthalmology. The Department will be concerned with research in ophthalmic epidemiology in its broadest sense and have a strong commitment to work in Moorfields Eye Hospital on issues related to the delivery and effectiveness of healthcare. Although preference would be given to those with experience in ophthalmic epidemiology, the emphasis is on excellence in research, and applications from epidemiologists with experience in other areas and a willingness to develop a research programme committed to ophthalmic epidemiology will be welcomed. Two new senior lecturer level posts will be available for appointment by the new professor.

Those interested are invited to contact Professor Adam Sillito (Research Director), for further information (Telephone 071-608 6805, Fax 071-608 6852). The salary will be in the range £28,742-£48,945 according to negotiation and a London Allowance will be payable. Formal applications, comprising a curriculum vitae, a list of publications, details of research funding and the names of three referees should be sent to Miss C. Griffiths, Secretary, The Institute of Ophthalmology, Bath Street, London EC1V 9EL from whom further particulars may be obtained.

Closing date: 30 November 1992.

Third Annual Public Health Forum

TUBERCULOSIS
BACK TO THE FUTURE
18-21 April 1993

The meeting is intended for health care professionals and research scientists working on the control of tuberculosis particularly in developing countries. The specific objectives for the Forum are:

- To bring together both scientists working on different aspects of tuberculosis research and those involved with planning and implementing control of strategies
- To describe the global burden of tuberculosis and predict the likely trends over the next decade with special attention to the impact of the HIV epidemic
- To identify and prioritise major research issues relating to pathogenesis, diagnosis, clinical management, epidemiology, molecular biology, economics and control of tuberculosis
- To address specific questions relating to: diagnosis and clinical management, immunology and vaccines, chemoprophylaxis and drug therapy, and control strategies and resource allocation

THE FACULTY OF MEDICINE
UNIVERSITY OF BASLE, SWITZERLAND
invites applications for
Full Professorship in Social and Preventive Medicine/Chairmanship, Department of Social and Preventive Medicine

The Department of Social and Preventive Medicine is charged with tasks in the areas of epidemiology and environmental sciences, occupational medicine, and prevention. Among the responsibilities of the chairperson are those for teaching and examination of students of medicine, pharmacy and other professions as well as for continued medical education in prevention and public health. Several years' experience in teaching, research and leadership, including present research activities are expected.

Qualified university teachers with appropriate speciality training are asked to submit their application (in German) by October 31, 1992 to: Prof. D. Sasse, M.D., Dean of the Faculty of Medicine, Hebelstrasse 25, CH 4031 Basle, Switzerland.

Information about this post can be obtained from Prof. R. Battegay, M.D., Chairman of the Search Committee, Psychiatrische Universitätspoliklinik, Kantonsspital, Petersgraben 4, CH-4031 Basle; Tel. 61 265 51 14.
